Re: Report # 2019-01435MS.01 – Everest Solar CrossRail - Dual Rail System for Mono-Slope Roofs
Subject: Engineering Certification for the State of Oregon

PZSE, Inc. – Structural Engineers has provided engineering and span tables for the Everest Solar CrossRail, as presented in PZSE Report # 2019-01435MS.01, "Engineering Certification for the Everest Solar CrossRail - Dual Rail System for Mono-Slope Roofs". All information, data, and analysis therein are based on, and comply with, the following building codes and typical specifications:

Building Codes:
1. 2019 Oregon Structural Specialty Code
2. ASCE/SEI 7-16, Minimum Design Loads for Buildings and Other Structures, by American Society of Civil Engineers
5. AC428, Acceptance Criteria for Modular Framing Systems Used to Support Photovoltaic (PV) Panels, November 1, 2012 by ICC-ES

Design Criteria:
- Risk Category II
- Seismic Design Category = A - E
- Exposure Category = B, C & D
- Basic Wind Speed (ultimate) per ASCE 7-16 = 95 mph to 200 mph
- Ground Snow Load = 0 to 100 (psf)

This letter certifies that the loading criteria and design basis for the Everest Solar CrossRail Span Tables are in compliance with the above codes.

If you have any questions on the above, do not hesitate to call.
