

# SingleHook

- ▶ High quality, German engineered system optimized for residential installation
- ▶ Provides 5.5 inches of East/West adjustability
- ▶ Refined geometry and minimized use of material allows larger spans between roof hooks
- ▶ 100% code-compliant
- ▶ High quality aluminum provides high corrosion resistance
- ▶ Fast installation, minimal component count resulting in low total installed cost
- ▶ Quick and inexpensive with direct lateral access to the rail without additional components, including individual height adjustment
- ▶ Secure slide-in assembly, without screwing to the base plate
- ▶ Base plate with slotted bore holes in line, compliant with standards even of narrow rafters
- ▶ Modular design suitable for any CrossRail System size

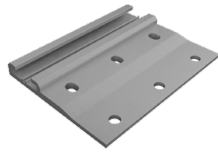

# Components

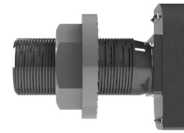

## SingleHook

Landscape and portrait mounting with MiniClamp MC/EC

## SingleHook Mounting Base

- ▶ Universal module clamp
- ▶ Clamp is rotatable
